Historical Note

In 1989 Chinati welcomed John Wesley as its inaugural artist in residence.¹ Every year since, Chinati has hosted artists for self-directed residencies in which they are provided with housing on the grounds and studio space. Artists are not required to produce anything during their residency, but most mark their time with an open studio or exhibition. There are generally 5-7 artists selected each year for 1-2 month residencies, depending on scheduling and availability.

¹ For the full list of Chinati's artists in residence, see *Chinati: The Vision of Donald Judd*, Second Edition p.336 or <https://chinati.org/programs/artists-in-residence/full-list-of-chinati-artists-in-residence/>

Artists who are not selected for residencies are sometimes offered time and space at Chinati as visiting artists if/when possible.

Scope and Contents

This record group is organized into 5 series, with individual artists' files organized into chronological sub-series based on the year of the artist's residency. As with the Special Exhibition Artists Records, artists' files may contain not only records and correspondence related to their residency but also general correspondence, press, and other material about their work in general. Individual artists' files will vary depending on the artist, their work, and their relationship to Chinati.

For artists in residence whose work is featured in a special exhibition, records related to their residency are housed as a sub-series of their corresponding Special Exhibition Artists record group.
